

ADRIAN ZAVALA

FRONTEND DEVELOPER

Summary

Motivated front-end developer with a strong foundation in JavaScript, React, CSS, and Tailwind, complemented by a unique background in restaurant management. Recently completed the Full Stack Honors Certification program at Nucamp, and developed a successful web page for both my restaurants, El Faro & El Faro 2. Eager to leverage my technical skills and management experience in a dynamic development team.

Employment

El Faro 2 Riverside, IL Manager + Webmaster Dec. 2019 to Current

- Promoted to manager to lead operations of the newly opened second location, El Faro 2.
- Successfully expanded the restaurant menu to online delivery for the first time, increasing revenue by 25%.
- Developed and launched both restaurants' first web page, improving online presence and customer engagement.
- Implemented new systems to streamline workflow and reduce operational costs by 15%.

El Faro 1 Summit, IL Team Member June 2009 to Nov. 2019

- Started as a team member, learning all aspects of restaurant operations, from customer service to inventory management.
- Contributed to maintaining high standards of food quality and customer satisfaction, resulting in a loyal customer base.

Projects

2k-detail Webpage

- Developed a responsive and user-friendly website for a car detailing company to display a the company's services and to submit a form to schedule appointments with their choices of services.
- Technology used: Nextjs, React, Tailwind CSS, and Framer Motion

El Faro Website

- Developed a responsive and user-friendly website for both restaurants that displays information such as the filtered menu, driving instructions, and history. Enhancing the restaurant's digital footprint and improving customer interaction.
- Technology used: Nextjs, React, Tailwind CSS, and Framer Motion

Anime Watch list

- Developed a dynamic and interactive anime watch list application featuring sorting system, membership, and login
- Implemented Firebase for authentication, enabling users to create accounts, log in, and manage their personalized watchlists.
- Technology used: React, Tailwind CSS, Formik, Axios, and Firebase
